Practical Completion	5 marks							
Executive summary Effectively summarises report, providing key information.	5 marks	Poor or missing executive summary. Little or no information relating to the description of the task, approach, data, results and/or insights.	Inadequate executive summary. Missing information relating to the description of the task, approach, data, results and/or insights.	Limited executive summary. Includes some description of the task but may be missing information relating to the approach, data, results and insights.	Adequate executive summary that includes a basic description of the task, and basic summaries of the approach, data, results and insights.	Good executive summary that includes an accurate description of the task, and good summaries of the approach, data, results and insights.	Thorough executive summary that allows the reader to easily become acquainted with the task, approach taken, data, results and insights.	Outstanding executive summary that allows the reader to rapidly become acquainted with the task, approach taken, data, results and insights.
Methodology Summary of the process followed to analyse, summarise and draw conclusions from data.	10 marks	Poor or missing summary of the process followed to analyse and/or summarise the data in order to draw conclusions.	Missing details on how data was analysed and/or summarised in order to draw conclusions.	Limited summary of how data was analysed and/or summarised in order to draw conclusions.	Adequate summary of how social media data was analysed and summarised in order to draw conclusions.	Good summary of how social media data was analysed and summarised in order to draw conclusions. Gives the reader a good insight into the process.	Thorough summary of how social media data was analysed and summarised in order to draw conclusions. Gives the reader a very good insight into the process.	Outstanding summary of how social media was analysed and summarised in order to draw conclusions. Gives the reader an excellent insight into the process.
Data description Summary detailing the data that has been chosen.	5 marks	Poor or missing examination of data that has been chosen. Missing most or all of the minimum information expected (i.e. number of posts, search terms, unique users, date range and geographical area).	Inadequate examination of data that has been chosen. Missing at least some of the minimum information expected (i.e. number of posts, search terms, unique users, date range and geographical area).	Limited examination of data that has been chosen. May not include the minimum information expected (i.e. number of posts, search terms, unique users, date range and geographical area).	Adequate examination of data that has been chosen. At a minimum, should include information on the number of posts, search terms, unique users, date range and geographical area.	Good examination of data that has been chosen. Includes the minimum level of data (number of posts, search terms, unique users, date range and geographical area) as well as some additional data.	Thorough examination of data that has been chosen. Includes the minimum level of data (number of posts, search terms, unique users, date range and geographical area) as well as a range of additional data.	Outstanding examination of data that has been chosen. Includes the minimum level of data (number of posts, search terms, unique users, date range and geographical area) as well as a wide range of additional data.
Brand Exploration Analysis of the brand's relationship with the public on social media.	30 marks	Poor or missing exploratory analysis of the brand's relationship with people on social media. Does not explore a range of items (e.g., unique users, reposts and favourites, followers and friends, hashtags, keywords, location), poor or missing quantitative analytics techniques.	Inadequate exploratory analysis of the brand's relationship with people on social media. Likely to be missing an exploration of a range of items (e.g., unique users, reposts and favourites, followers and friends, hashtags, keywords, location), or missing the use of quantitative analytics techniques.	Limited exploratory analysis of the brand's relationship with people on social media. May be lacking an exploration of a range of items (e.g., unique users, reposts and favourites, followers and friends, hashtags, keywords, location), or missing the use of quantitative analytics techniques.	Adequate exploratory analysis of the brand's relationship with people on social media. Provides exploration of a range of items (e.g., unique users, reposts and favourites, followers and friends, hashtags, keywords, location) demonstrating adequate use of quantitative analytics techniques, such as topic modelling, word-co-occurrence, sentiment analysis, user centrality measures, user clustering.	Good exploratory analysis of the brand's relationship with people on social media. Provides exploration of a range of items (e.g., unique users, reposts and favourites, followers and friends, hashtags, keywords, location) demonstrating good use of a range of quantitative analytics techniques, such as topic modelling, word-co-occurrence, sentiment analysis, user centrality measures, user clustering.	Thorough exploratory analysis of the brand's relationship with people on social media. Provides thorough exploration of a range of items (e.g., unique users, reposts and favourites, followers and friends, hashtags, keywords, location) demonstrating very good use of a range of quantitative analytics techniques, such as topic modelling, word-co-occurrence, sentiment analysis, user centrality measures, user clustering.	Outstanding exploratory analysis of the brand's relationship with people on social media. Provides outstanding exploration of a range of items (e.g., unique users, reposts and favourites, followers and friends, hashtags, keywords, location) demonstrating excellent use of a range of quantitative analytics techniques, including but not limited to topic modelling, word-co-occurrence, sentiment analysis, user centrality measures, user clustering.
Micro-influencer Recommendation of a micro-influencer.	15 Marks	Poor or missing recommendation of micro-influencer; if recommendation has been made, choice is appropriate; poor or missing evaluation of metrics to support choice.	Inadequate recommendation of micro-influencer, who may not be appropriate; inadequate evaluation of metrics to support choice.	Limited recommendation of micro-influencer; a limited evaluation of metrics to support choice.	Adequate recommendation of micro-influencer, justified by an adequate evaluation of metrics such as sentiment towards brand, reposts and favourites to posts, friends and followers, network centrality to support choice.	Good recommendation of micro-influencer, justified by a good evaluation of metrics such as sentiment towards brand, reposts and favourites to posts, friends and followers, network centrality to support choice.	Excellent recommendation of an appropriate micro-influencer, justified by a thorough evaluation of metrics such as sentiment towards brand, reposts and favourites to posts, friends and followers, network centrality to support choice.	Excellent recommendation of an appropriate micro-influencer, justified by a outstanding evaluation of metrics including sentiment towards brand, reposts and favourites to posts, friends and followers, network centrality to support choice.
Conclusion Conclusion, insights and recommendations.	5 marks	Poor or no conclusions or recommendations have been drawn or they are inconsistent with the findings of the analysis. Poor or no insight demonstrated.	Inadequate conclusions and/or recommendations have been drawn, or are inconsistent with the findings of the analysis. Lacks insight.	Limited conclusions and/or recommendations have been drawn, or they are inconsistent with the findings of the analysis. Likely to lack any appropriate insight.	Adequate conclusions and recommendations have been drawn, which are consistent with the findings of the analysis. Some insight demonstrated but scope for further development.	Good conclusions and recommendations have been drawn, which are consistent with the findings of the analysis and demonstrate good insight.	Developed and thorough conclusions and recommendations have been drawn, which are consistent with the findings of the analysis. Demonstrates excellent insight.	Outstanding conclusions and recommendations have been drawn, which are consistent with the findings of the analysis. Demonstrates outstanding insight.

Functionality Appropriate tools are used to analyse data.	15 marks	Does not demonstrate the effective use of a python script to analyse data.	Likely to be missing evidence of the effective use of a python script to analyse the available data; script may be lacking in appropriate comments.	May not demonstrate effective use of a python script to analyse the available data; script may be lacking in appropriate comments.	Adequate use of a python script to analyse data, which also includes some appropriate comments.	Good use of a python script to analyse data, as well as appropriate comments.	Excellent, effective use of a python script to analyse the data. There is a range of comments to support the data analysis.	Outstanding, effective use of a python script. There is a wide range of comments to support the data analysis.
Clarity Clarity and commenting.	5 marks	Writing is incoherent, resulting in poor or no clarity or focus.	Writing is incoherent, resulting in inadequate clarity and focus, or creating confusion as to the point being made.	Writing is incoherent at times resulting in limited clarity or creating some confusion as to the point being made.	Writing is largely coherent, but may demonstrate errors resulting in some confusion as to the point being made at times.	Good structure to the work showing good connection between key elements. Writing is coherent, and is grammatically-correct with good use of syntax to convey appropriate meaning, resulting in good clarity and focus making it easy to follow.	Writing is insightful and is grammatically-correct with good use of syntax to convey clear meaning, resulting in clarity, and focus throughout.	Writing is insightful, and is grammatically-correct with excellent use of syntax to convey clear meaning, resulting in clarity, and focus throughout; development of ideas is easy to follow.
Presentation Overall presentation and professionalism of report.	5 marks	Poorly structured piece of work with a lack of connecting key elements. Poorly formatted with poor or no evidence of proof reading, numerous errors. Overall report lacks professionalism.	Inadequately structured piece of work with inadequate attempt to connect key elements. Inadequately formatted with some errors, inadequate evidence of proof reading. Overall report lacks professionalism.	Limited structure to the work showing limited connection of key elements. Limited formatting with limited evidence of proof reading, numerous errors. Overall, report lacks some professionalism.	Adequate structure and presentation of the report showing adequate connection of key elements. Adequately formatted with few errors and shows evidence of proof reading. Overall, report shows an adequate level of professionalism.	Good structure to the report showing good connection between key elements. Good formatting with very few errors and shows good evidence of proof reading. Overall, report shows a good level of professionalism.	Well-structured report, effectively connecting key elements. Well-formatted work, with very few errors showing thorough proof reading. Overall report shows and excellent level of professionalism.	Convincingly structured piece of work effectively connecting key elements. Well-formatted work, free from errors showing extensive proof reading. Overall report is exceptionally professional.
