

Group Work - Meeting Record

VASP-N Consultancy

Turning Data into Decisions, and Decisions into Growth.

Course:	MSc Business Analytics	Module:	BUSI4372 - Leading Big Data Business Projects
Team name:	VASP-N Consultancy	Team Leader:	Vallabh Joshi

Group Members: Vallabh Joshi (VJ), Ashutosh Girish Shinde (AGS), Shreyash Chetan Meshram (SCM), Paras Yadav (PY), Noor Fatima Bhatti (NFB)

Project Company: Starbucks

Final Problem Area: Starbucks loyalty personalisation: moving away from one-size-fits-all customer treatment towards value-based customer segmentation and targeted campaign decisions.

This document records group meetings held between 28 January 2026 and 3 May 2026 for the VASP-N Consultancy group coursework. It follows the meeting record format required for group work submission.

Meeting 1 (Informal)

Location:	In Person - University of Nottingham	Date:	28 January 2026
Present:	VJ, AGS, SCM, PY, FB	Apologies:	None

Review of Previous Actions

No previous actions as this was the first meeting.

Discussion Notes

1. Initial introductions

All five members met informally after the BUSI4372 lecture. This was the first time the group came together following team allocations on Moodle.

2. Communication channels

Members exchanged contact details. The group agreed to set up a WhatsApp group for quick updates and Microsoft Teams for formal meetings and document sharing. VJ created the WhatsApp group on the same day and added all members.

3. Brief overview

The group briefly discussed the coursework brief at a high level. A few company names were mentioned casually but no serious discussion took place. Members agreed they would each read the brief and marking rubric individually before the next formal meeting.

4. Next steps

PY offered to set up the first formal Microsoft Teams meeting. The group agreed to aim for a session in mid-February once everyone had reviewed the brief.

Actions Arising

Issue	Detail	Who?	Timeline	Status
WhatsApp group	Create group chat and add all members	VJ	28 Jan	Complete
Read brief	All members to read the coursework brief and marking rubric individually	All	Before Meeting 2	Due
Schedule meeting	Set up first formal Microsoft Teams meeting	PY	Early Feb	Due

Meeting 2

Location:	Microsoft Teams	Date:	17 February 2026
Present:	VJ, AGS, SCM, PY, FB	Apologies:	None

Review of Previous Actions

Issue	Detail	Who?	Timeline	Status
WhatsApp group	Created on 28 Jan. All members added and actively using it.	VJ	28 Jan	Complete
Read brief	All members confirmed they had read the brief and rubric.	All	Before Meeting 2	Complete
Schedule meeting	Teams meeting arranged. Calendar invite sent.	PY	10 Feb	Complete

Discussion Notes

1. Collaborative Working Agreement

The group reviewed the CWA template from Moodle section by section. Key terms agreed collectively: weekly meetings via Microsoft Teams; WhatsApp for day-to-day communication; decisions by majority vote with open discussion; equitable workload distribution based on individual strengths; attendance expected with advance notice if unable to join; disagreements resolved through discussion first, escalation to tutor if needed. All five members signed the CWA digitally.

2. Election of Team Leader

The team leader role was discussed as outlined in the brief - responsible for task allocation, monitoring progress, and submitting documents, but not expected to do extra work. VJ volunteered and was unanimously elected by all members.

3. Initial company brainstorming

The group revisited the brief requirements together: B2C focus, digital marketing presence, suitable for hypothetical data generation. Several companies were mentioned across the discussion - Sports Direct, Nike, ASOS, Boots, Starbucks, McDonald's. Each member committed to research one or two potential companies and assess them against the brief criteria before the next meeting.

4. Any other business

SCM offered to set up a Google Drive shared folder for documents, research notes, and pitch materials. Meeting frequency to be confirmed at the next session once the group had a better sense of the pace needed.

Actions Arising

Issue	Detail	Who?	Timeline	Status
CWA upload	Upload signed CWA to shared folder; submit on Moodle with final pitch	VJ	20 Feb	Due
Company research	Each member to research one or two potential companies and assess against brief criteria	All	Before Meeting 3	Due
Shared folder	Create Google Drive shared folder for group documents and research	SCM	18 Feb	Due

Meeting 3

Location:	In Person - Jubilee Campus	Date:	25 February 2026
Present:	VJ, AGS, SCM, PY, FB	Apologies:	None

Review of Previous Actions

Issue	Detail	Who?	Timeline	Status
CWA upload	CWA uploaded to shared folder. Final Moodle submission to follow with pitch.	VJ	20 Feb	Complete
Company research	Each member completed preliminary research on assigned companies.	All	Before Meeting 3	Complete
Shared folder	Google Drive folder created and shared with all members.	SCM	18 Feb	Complete

Discussion Notes

1. Working rhythm

The group acknowledged they were behind where they should be at this stage. NFB stressed the importance of meeting regularly and delivering on commitments each week. The group agreed collectively on a regular meeting schedule of every Tuesday evening via Microsoft Teams. Tuesday was chosen deliberately because the group has a Wednesday lecture, allowing them to enter each lecture having already discussed progress and addressed any blockers.

2. Company shortlist discussion

Each member presented the companies they had researched. Sports Direct, Boots, Starbucks, Nike, and ASOS all received discussion time. The group debated each option's strengths and weaknesses together. No final decision was reached, but the group identified that the strongest candidate would be one with a clearly articulated business problem the company itself acknowledged, suitable for a focused analytics solution.

3. Selection criteria agreed

The team agreed three selection criteria for the final company through open group discussion: (a) the problem can be explained in one clear sentence, (b) the problem is supported by company-acknowledged evidence rather than only external commentary, and (c) the analytics solution can be delivered through the data types specified in the brief - transactional, marketing campaign, customer survey, and external.

4. Timeline awareness

NFB reminded the group of the 5 May submission deadline. A rough working timeline was agreed collaboratively: finalise company and problem by mid-March, methodology and structure by end of March, pitch content drafted by mid-April, recording before submission week. The group agreed to refine this timeline into a formal project plan once the company was locked in.

Actions Arising

Issue	Detail	Who?	Timeline	Status
Deeper research	Each member to deepen research on shortlisted companies, focusing on company-acknowledged problems	All	Before Meeting 4	Due
Selection matrix	Prepare a comparison matrix covering problem clarity, data suitability, and campaign relevance	NFB	Before Meeting 4	Due
Brief mapping	Map the brief's required data types to the realistic data each shortlisted company would hold	VJ, SCM	Before Meeting 4	Due

Meeting 4

Location:	Microsoft Teams	Date:	3 March 2026
Present:	VJ, AGS, SCM, PY, FB	Apologies:	None

Review of Previous Actions

Issue	Detail	Who?	Timeline	Status
Deeper research	All members presented updated research findings on shortlisted companies.	All	Before Meeting 4	Complete
Selection matrix	Comparison matrix prepared and circulated before the meeting.	NFB	Before Meeting 4	Complete
Brief mapping	Brief data types mapped to realistic data sources for each shortlisted company.	VJ, SCM	Before Meeting 4	Complete

Discussion Notes

1. Comparison matrix review

NFB walked the group through the comparison matrix. The group debated each shortlisted company's score against the three agreed criteria. Sports Direct and Boots were judged strong on data context but weaker on company-acknowledged evidence at the depth the brief seemed to expect. Nike and ASOS had stronger executive admissions on the record but raised complexity concerns around US market focus.

2. Open question on evidence type

AGS raised a methodological concern: relying on external review data might require the group to argue a problem exists rather than respond to one the company has already named. Several members debated this. The group agreed it was an important distinction, and that evidence quality would weigh more heavily in the next round of research.

3. Working pace

VJ noted that the group needed to lock the company within two more meetings to leave enough time for methodology, slide build, and rehearsal. The team agreed collectively to bring sharper, more specific evidence to the next meeting - direct quotes from named executives rather than third-party commentary.

4. Any other business

PY reminded the group that meeting minutes and the CWA must be submitted alongside the final pitch. NFB confirmed she had been maintaining minutes throughout, with input from all members.

Actions Arising

Issue	Detail	Who?	Timeline	Status
Targeted evidence	Each member to find at least one direct executive quote from their researched company	All	Before Meeting 5	Due
Approach paper	Draft a one-page note explaining the group's approach (problem-first, company-acknowledged, analytics-led)	AGS	Before Meeting 5	Due
Cross-check on data sources	Members to cross-check each other's data-source mappings for realism	PY, NFB	Before Meeting 5	Due

Meeting 5

Location:	Microsoft Teams	Date:	10 March 2026
Present:	VJ, AGS, SCM, PY, FB	Apologies:	None

Review of Previous Actions

Issue	Detail	Who?	Timeline	Status
Targeted evidence	All members brought executive quotes from their researched companies.	All	Before Meeting 5	Complete
Approach paper	AGS drafted the approach note. Reviewed and refined collectively at this meeting.	AGS	Before Meeting 5	Complete
Cross-check on data sources	Mappings cross-checked. Minor refinements suggested.	PY, NFB	Before Meeting 5	Complete

Discussion Notes

1. Approach paper review

AGS presented the approach paper. The group debated and refined the wording collectively. Three principles were agreed: the company must publicly acknowledge the problem, the analytics must directly solve that named problem, and the solution must use the brief's specified data types. The paper was accepted as the group's working framework for the rest of company selection.

2. Evidence comparison

Each member shared the executive quotes they had found. PY's research on Starbucks raised significant interest - Tressie Lieberman's Investor Day statement about the loyalty programme being one-size-fits-all was identified by the group as a clear, recent, on-record statement about a specific problem. NFB observed that this kind of direct admission was exactly what the

approach paper had described as ideal. AGS and SCM both noted how cleanly it would map to a segmentation-and-personalisation analytics solution.

3. Other shortlisted companies

Quotes from Boots, Nike, and ASOS were also discussed by the group. Each had merit but were weighed against the agreed criteria. The group did not yet make a final call but noted that Starbucks was emerging as a strong candidate.

4. Sharpening criteria

SCM proposed adding a fourth criterion: the analytics must be deliverable in seventeen weeks with a five-person team. The group agreed. This further sharpened the difference between candidates with broad strategic problems and candidates with focused, analytics-shaped problems.

Actions Arising

Issue	Detail	Who?	Timeline	Status
Starbucks deep-dive	PY to lead deeper research on Starbucks; all members contribute supplementary findings	PY (lead), All	Before Meeting 6	Due
Final-round comparison	All members refine their company evidence and bring final round to next meeting	All	Before Meeting 6	Due
Methodology scan	Begin preliminary scan of analytics techniques relevant to loyalty / segmentation / churn / MMM	AGS, NFB	Before Meeting 6	Due

Meeting 6

Location:	Microsoft Teams	Date:	17 March 2026
Present:	VJ, AGS, SCM, PY, FB	Apologies:	None

Review of Previous Actions

Issue	Detail	Who?	Timeline	Status
Starbucks deep-dive	PY led the deep-dive with supplementary input from all members. Strong evidence base assembled.	PY (lead), All	Before Meeting 6	Complete
Final-round comparison	Members brought final evidence on their researched companies.	All	Before Meeting 6	Complete
Methodology scan	AGS and NFB produced a one-page summary of candidate techniques: RFM, k-means, logistic regression, multiple regression for MMM.	AGS, NFB	Before Meeting 6	Complete

Discussion Notes

1. Starbucks emerges as preferred candidate

PY presented the Starbucks deep-dive. Multiple supporting data points: thirty-five-and-a-half million ninety-day active Rewards members, five years of transaction history, a ten-thousand-member psychographic survey, and a public commitment to a marketing-led turnaround. The Lieberman quote on Investor Day, the new tier launch in March 2026, and the published statements

about broad-reach marketing all aligned to a clear, current, well-documented problem. The group agreed collectively that this was the strongest candidate.

2. Other candidates assessed

Members presented their final findings on Boots, Nike, and ASOS. Each was strong in some respects but none combined the directness of the executive admission, the data-richness, and the campaign relevance as cleanly as Starbucks. Tentative consensus reached: Starbucks the preferred candidate, with one more meeting before formal lock-in.

3. Methodology direction

AGS and NFB walked through their methodology scan jointly. The group agreed collaboratively that customer segmentation (RFM with k-means) should be the primary technique, supported by churn classification (logistic regression) and marketing mix modelling (multiple regression with channel-by-segment interaction). All three techniques aligned to the brief's required types - clustering, classification, regression.

4. Risk note

NFB flagged that the project was on a tight schedule. Easter break would begin after the 24 March in-person session, with all preparation work needing to happen remotely over the break. The group agreed to use 24 March for the final lock-in deep-dive and 31 March for formal problem-statement confirmation.

Actions Arising

Issue	Detail	Who?	Timeline	Status
Starbucks final deep-dive	PY to lead final evidence pack assembly; SCM to cross-check data context	PY (lead), SCM	Before Meeting 7	Due
Methodology shortlist	AGS and NFB to produce detailed comparison of candidate methods with chosen-vs-rejected rationale	AGS, NFB	Before Meeting 7	Due
Pre-break planning	Plan break-period meeting cadence, work allocation, deliverable schedule	VJ	Before Meeting 7	Due

Meeting 7

Location:	In Person - University of Nottingham	Date:	24 March 2026
Present:	VJ, AGS, SCM, PY, FB	Apologies:	None

Review of Previous Actions

Issue	Detail	Who?	Timeline	Status
Starbucks final deep-dive	Comprehensive evidence pack ready, with cross-checks complete.	PY, SCM	Before Meeting 7	Complete
Methodology shortlist	Detailed comparison presented: chosen techniques and named alternatives with reasoned trade-offs.	AGS, NFB	Before Meeting 7	Complete
Pre-break planning	VJ proposed meeting cadence covering the break period, with target deliverables for each session.	VJ	Before Meeting 7	Complete

Discussion Notes

1. Starbucks evidence pack

PY walked the group through the evidence pack. Key elements reviewed collectively: the Lieberman quote (Investor Day, 29 January 2026); the new tier launch (Green / Gold / Reserve, 10 March 2026); thirty-five-and-a-half million ninety-day active Rewards members; five years of transaction history; ten-thousand-member psychographic survey; and the publicly documented Deep Brew AI personalisation engine. Every claim was sourced. The group agreed unanimously that the evidence base was strong enough to proceed.

2. Methodology shortlist

AGS and NFB walked through the methodology comparison together. Three techniques recommended: k-means clustering (chosen over hierarchical clustering for scalability and data-driven segment count), logistic regression for churn (chosen over gradient boosting for interpretability and GDPR Article 22 compliance), and multiple regression with interaction terms for MMM (chosen over aggregate marketing mix modelling because aggregates flatten segment-level differences). The group debated each trade-off and accepted the framework. All members agreed the reasoned trade-offs would be a strength of the pitch.

3. Framing discussion

Significant group discussion on how to frame the problem in the pitch. The group agreed collectively that the framing should not present the tier launch as failed - instead, the analytics layer should be positioned as a complement to it. This avoided the persuasion trap and made the pitch read as a partnership offer rather than a critique. The framing principle: name what Starbucks has done, position the data layer as the next step beyond what tiers can reach.

4. Project plan and work-package structure

The group worked together to define the seventeen-week project structure. All five members contributed to deciding the work packages, milestones, and dependencies. Four work packages were agreed: WP1 Discovery and Data Foundation (weeks 1-4), WP2 Modelling and Validation (weeks 5-10), WP3 Activation Design (weeks 11-13), WP4 Findings and Handover (weeks 14-17). Quality gates and the critical path were debated and agreed by the group. PY would later build the Gantt visual since he is presenting the timeline slide.

5. Easter break planning

VJ confirmed the planned cadence over Easter. Four Teams meetings (31 March, 7 April, 14 April, 21 April) covering: problem-statement lock-in, methodology / branding / work allocation, slide outline and content prep, and rough first-draft deck. Members agreed deliverables for each session. Recording and rehearsal to take place in person after the break.

Actions Arising

Issue	Detail	Who?	Timeline	Status
Problem statement draft	Draft the final problem statement for formal lock-in at next meeting	NFB	Before Meeting 8	Due
Methodology write-up	Produce concise written rationale for each technique with named alternatives	AGS	Before Meeting 8	Due
Gantt visual build	Build Gantt chart visual based on group-agreed work-package structure	PY	Before Meeting 8	Due
Branding direction	All members propose branding ideas; group selects palette and typography	All	Before Meeting 8	Due
Slide structure	Draft sixteen-slide structure mapping the brief's required sections; group reviews jointly	SCM	Before Meeting 8	Due

Meeting 8

Location:	Microsoft Teams	Date:	31 March 2026
Present:	VJ, AGS, SCM, PY, FB	Apologies:	None

Review of Previous Actions

Issue	Detail	Who?	Timeline	Status
Problem statement draft	NFB presented the draft for formal review.	NFB	Before Meeting 8	Complete
Methodology write-up	AGS produced concise rationales for clustering, classification, regression.	AGS	Before Meeting 8	Complete
Gantt visual build	PY produced first version of Gantt visual based on group-agreed structure.	PY	Before Meeting 8	Complete
Branding direction	Each member proposed branding ideas and shared in the group folder.	All	Before Meeting 8	Complete
Slide structure	SCM produced a sixteen-slide outline mapping all brief elements.	SCM	Before Meeting 8	Complete

Discussion Notes

1. Problem statement formally locked in

NFB walked the group through the draft. After collective discussion and minor edits proposed by VJ and AGS, the group formally agreed the final problem statement: Starbucks needs to move beyond a one-size-fits-all loyalty approach and adopt member-level behavioural intelligence to personalise the offer, cadence, and channel calibrated to each member's actual behaviour and value. All five members confirmed agreement. From this point forward, the problem statement was locked and not to be reopened.

2. Methodology confirmed

AGS's three-method framework was reviewed and formally adopted by the group: k-means clustering (segmentation), logistic regression (churn), multiple regression with interaction terms (MMM). The named-alternatives rationale was agreed as the basis for the methodology slide content.

3. Project plan and Gantt review

PY presented the Gantt visual based on the group-agreed work-package structure from Meeting 7. The group reviewed the visual collectively and proposed minor adjustments to milestone positioning. Critical-path tasks were highlighted with the group's input. PY to refine the visual based on the meeting feedback.

4. Branding selection

Each member's branding proposals were displayed in the meeting. After collective discussion, the group selected a combined direction: cream (#F5F1E8) and deep green (#0E3A2A) with gold accent (#C8A14B), to align with starbucks branding. PY, NFB, and SCM proposals all contributed elements to the final selection. PY to synthesise into a master template for consistent application across the deck.

5. Slide structure

SCM's sixteen-slide outline was reviewed by the group. Each slide's purpose and required content was discussed collectively. Slide ownership was agreed based on the speaker rotation: Slides 1, 2, 3, 16 to VJ; Slides 4, 5, 6 to AGS; Slides 7, 8, 9 to NFB; Slides 10, 11, 12 to SCM; Slides 13, 14, 15 to PY. Each member would lead final lock-in of their assigned slide content, with the rest of the group reviewing and refining at each meeting.

Actions Arising

Issue	Detail	Who?	Timeline	Status
Slides 1, 2, 3, 16 content	VJ to draft content for assigned slides; circulate for group review	VJ	Before Meeting 9	Due
Slides 4, 5, 6 content	AGS to draft content for assigned slides; circulate for group review	AGS	Before Meeting 9	Due
Slides 7, 8, 9 content	NFB to draft content for assigned slides; circulate for group review	NFB	Before Meeting 9	Due
Slides 10, 11, 12 content	SCM to draft content for assigned slides; circulate for group review	SCM	Before Meeting 9	Due
Slides 13, 14, 15 + Gantt refinement	PY to draft content for assigned slides + refine Gantt visual	PY	Before Meeting 9	Due
Master slide template	Apply agreed branding to a master template for all members to use	PY	Before Meeting 9	Due

Meeting 9

Location:	Microsoft Teams	Date:	7 April 2026
Present:	VJ, AGS, SCM, PY, FB	Apologies:	None

Review of Previous Actions

Issue	Detail	Who?	Timeline	Status
Slides 1, 2, 3, 16 content	VJ produced first-draft content. Circulated for review.	VJ	Before Meeting 9	Complete
Slides 4, 5, 6 content	AGS produced first-draft content. Circulated for review.	AGS	Before Meeting 9	Complete
Slides 7, 8, 9 content	NFB produced first-draft content. Circulated for review.	NFB	Before Meeting 9	Complete
Slides 10, 11, 12 content	SCM produced first-draft content. Circulated for review.	SCM	Before Meeting 9	Complete
Slides 13, 14, 15 + Gantt	PY produced first-draft content; Gantt visual refined.	PY	Before Meeting 9	Complete
Master template	PY built the master template with agreed branding.	PY	Before Meeting 9	Complete

Discussion Notes

1. Group review of all slide content

Each member walked the group through their drafted slide content. The group reviewed every slide collaboratively. Each draft received feedback from at least three other members. Specific group-level decisions: methodology slide (Slide 6) - chosen-vs-

rejected framing accepted; segmentation slide (Slide 7) - Lapsing Members highlighted as tier-agnostic on NFB's draft, with AGS and SCM proposing visual treatments; KPI slide (Slide 10) - model-quality metrics moved to in-flight checkpoints to keep the slide marketing-readable, on collective input; ethics slide (Slide 15) - PY's draft expanded to include methodological-honesty pillar following AGS's suggestion.

2. Frameworks layered in

The group reviewed which Week 9 frameworks would be cited where. Decisions made together: STP and Big Data + Thick Data on the segmentation slide. 7Ps on the marketing-mix slide. RACE on the activation slide. Personal Data Ecosystem on the data slide. Big Data Stack on the technology slide. Privacy by Design (Cavoukian) and FAccT on the ethics slide. Each citation tied to a specific slide footer band.

3. Speaker rotation confirmed

VJ confirmed the speaker rotation matching slide ownership: every member presents their three slides, with VJ taking four (covering the open and close of the deck). The rotation was reviewed and accepted by all members.

4. Visual style and AI image generation

The group agreed that for each slide requiring imagery, every member would generate AI image options using Microsoft Designer, Canva, and similar tools. Options would be shared in the group folder, and the group would jointly select the strongest visual for each slide. This collaborative image generation approach ensured visual quality without overloading any single member.

Actions Arising

Issue	Detail	Who?	Timeline	Status
VJ slides - refine	Refine Slides 1, 2, 3, 16 based on group feedback	VJ	Before Meeting 10	Due
AGS slides - refine	Refine Slides 4, 5, 6 based on group feedback	AGS	Before Meeting 10	Due
NFB slides - refine	Refine Slides 7, 8, 9 based on group feedback	NFB	Before Meeting 10	Due
SCM slides - refine	Refine Slides 10, 11, 12 based on group feedback	SCM	Before Meeting 10	Due
PY slides - refine	Refine Slides 13, 14, 15 based on group feedback	PY	Before Meeting 10	Due
Image generation round 1	All members generate AI image options for assigned slides; share in group folder	All	Before Meeting 10	Due

Meeting 10

Location:	Microsoft Teams	Date:	14 April 2026
Present:	VJ, AGS, SCM, PY, FB	Apologies:	None

Review of Previous Actions

Issue	Detail	Who?	Timeline	Status
VJ slides - refine	Slides refined based on feedback. Stronger framing on Slide 2.	VJ	Before Meeting 10	Complete

AGS slides - refine	Methodology slide tightened. Solution overview clearer.	AGS	Before Meeting 10	Complete
NFB slides - refine	STP slide expanded with five-segment detail. RACE table refined.	NFB	Before Meeting 10	Complete
SCM slides - refine	KPI slide structure clarified. Tech stack tightened.	SCM	Before Meeting 10	Complete
PY slides - refine	Gantt visual refined. Team and ethics slides tightened.	PY	Before Meeting 10	Complete
Image generation round 1	All members contributed AI image options. Group folder populated for review.	All	Before Meeting 10	Complete

Discussion Notes

1. Slide-by-slide content review

The group walked through each of the sixteen slides together. Content was accepted in principle for thirteen of them. Three slides flagged for further work: title slide (visual treatment not yet finalised), team slide (photos pending), and close slide (tone needed final tightening). All other content was approved as the working draft.

2. AI image selection round

The group reviewed all AI-generated image options collectively. For each slide, members had each contributed at least one or two image options. The group selected the strongest visual for each slide through open discussion: the SEGMENT/PREDICT/ALLOCATE/CAMPAIGN row from a combination of NFB and PY options; the STP cup arrangement from PY's Microsoft Designer output; the technology stack visual from SCM's Canva work; the title slide atmospheric scene from VJ's Microsoft Designer generation. Every member's contributions were used somewhere in the deck.

3. Visual consistency check

PY led a consistency check across the deck. The cream / deep green / gold palette applied consistently to all slides. Typography unified throughout. Soft 3D illustration style for analytics-concept slides; photographic atmospheric style for title and section dividers. SCM and NFB both contributed observations; minor adjustments agreed.

4. Rubric alignment check

AGS and NFB jointly led a structured rubric-alignment review. Theories & Concepts (20%): eleven frameworks named, fourteen distinct sources cited. Analysis of Evidence (20%): every claim sourced; methodological honesty named alternatives. Project Plan & Analytics (30%): three analytics products mapped one-to-one to three structural problems; full WBS with critical path. Presentation (30%): sixteen slides, ~14:30 runtime planned, all members present. The group judged the rubric alignment strong.

Actions Arising

Issue	Detail	Who?	Timeline	Status
Title slide visual	Members propose final title slide treatment; group selects best	All (PY synthesis)	Before Meeting 11	Due
Team photos	All members provide headshots; PY applies to team slide	All	Before Meeting 11	Due
Close slide tightening	Refine wording on close slide; ensure call-to-action lands cleanly	VJ	Before Meeting 11	Due
First full-deck draft	Assemble all sixteen slides into a single deck	PY, SCM	Before Meeting 11	Due

Meeting 11

Location:	Microsoft Teams	Date:	21 April 2026
Present:	VJ, AGS, SCM, PY, FB	Apologies:	None

Review of Previous Actions

Issue	Detail	Who?	Timeline	Status
Title slide visual	Final visual treatment selected - atmospheric coffee shop scene with VASP-N logo and brand mark.	All (PY synthesis)	Before Meeting 11	Complete
Team photos	All members provided headshots; applied to team slide.	All	Before Meeting 11	Complete
Close slide tightening	Final wording applied. Call-to-action reads cleanly.	VJ	Before Meeting 11	Complete
First full-deck draft	Sixteen-slide deck assembled, branded, and circulated for review.	PY, SCM	Before Meeting 11	Complete
Script v1	Each member produced a draft script for their assigned slides.	All	Before Meeting 11	Complete
Cross-review pairs	Each member reviewed another member's script. Feedback exchanged.	All	Before Meeting 11	Complete

Discussion Notes

1. Full deck review

The group walked through the assembled deck end-to-end. Visual flow consistent, narrative arc holds across the sixteen slides. Three minor visual fixes flagged collectively: the methodology slide footers slightly overflowing; the timeline slide critical-path highlighting needed stronger contrast; the ethics slide subtitle needed more space below the heading. Each member assigned to apply fixes to their own slides; PY to oversee final visual consistency.

2. Script integration and cross-review

Each member read their refined script aloud during the meeting. The group identified three issues collectively: hand-offs between speakers were too abrupt in places; one section ran long compared to others; technical jargon in the methodology section needed simplification for marketing-audience tone. Members agreed to refine their scripts further and rehearse the hand-offs explicitly at the next session.

3. Timing pass

Initial timing across the full deck came in at approximately seventeen minutes, two minutes over the 15-minute target. The group identified specific sections to compress: methodology slide narration (AGS), KPI slide narration (SCM), and the close (VJ). Each speaker agreed which words to trim from their own sections.

4. Risk language addition

AGS proposed and the group accepted adding brief risk-and-mitigation language within the ethics slide rather than on a separate slide - covering data quality, privacy compliance, and implementation adoption. PY (presenting Slide 15) agreed to integrate the risk language with input from AGS and NFB.

Actions Arising

Issue	Detail	Who?	Timeline	Status
Visual fixes	Each member applies fixes to their own slides; PY oversees consistency	All (PY oversight)	Before Meeting 12	Due
Script refinements	Each member refines their own script for length, hand-off clarity, tone	All	Before Meeting 12	Due
Risk language	Integrate risk-and-mitigation language into ethics slide	PY (with AGS, NFB input)	Before Meeting 12	Due
Final deck v2 assembly	Re-assemble updated deck and circulate	PY, SCM	Before Meeting 12	Due
Reflection notes	Each member to begin individual reflective notes for the 500-word reflective piece	All	Before Meeting 14	Due

Meeting 12

Location:	Microsoft Teams	Date:	28 April 2026
Present:	VJ, AGS, SCM, PY, FB	Apologies:	None

Review of Previous Actions

Issue	Detail	Who?	Timeline	Status
Visual fixes	All members applied fixes. PY confirmed consistency across the deck.	All (PY oversight)	Before Meeting 12	Complete
Script refinements	All members refined their scripts. Tone and length improved.	All	Before Meeting 12	Complete
Risk language	Risk-and-mitigation language integrated into ethics slide.	PY	Before Meeting 12	Complete
Final deck v2 assembly	Updated deck re-assembled and circulated.	PY, SCM	Before Meeting 12	Complete
Reflection notes	Members confirmed they have begun their individual reflective notes.	All	Before Meeting 14	Pending

Discussion Notes

1. Script read-through

The group conducted a full Teams read-through of the script. Each member read their own slides in sequence. Hand-offs felt more natural than at the previous meeting. Two further refinements identified collectively: one slide's opening sentence needed a sharper hook; one transition between speakers still felt flat. Both flagged for the in-person rehearsal. Members owning the relevant slides took on the refinements.

2. Final timing

Total runtime now within fifteen minutes . A small buffer remains. The group judged the timing safe for recording.

3. Submission documents check

VJ ran a checklist of all required submission documents: final pitch deck, narration recording, meeting minutes (this document), Collaborative Working Agreement, individual reflective pieces. The CWA was confirmed signed and stored. Meeting minutes confirmed maintained throughout, with NFB leading and other members cross-checking. Reflective pieces to be completed individually before submission.

4. Next steps - in-person rehearsal and recording

The group confirmed the plan: full rehearsal in person on 1 May, recording on 3 May. Both sessions to take place in person. PY confirmed recording equipment and location.

Actions Arising

Issue	Detail	Who?	Timeline	Status
Hook refinement	Sharpen opening on the flagged slide	Owning member	Before Meeting 13	Due
Transition refinement	Smooth the flagged speaker-to-speaker transition	Owning members	Before Meeting 13	Due
Recording prep	Confirm recording equipment, location, backup plan	PY	Before Meeting 13	Due
Reflective pieces	Continue drafting individual reflective pieces	All	Before submission	Due
Meeting minutes update	Update meeting minutes through current session	NFB (with SCM cross-check)	Before Meeting 13	Due
CWA final check	Final check that the CWA is fully signed and ready for submission	VJ	Before Meeting 13	Due

Meeting 13

Location:	In Person	Date:	1 May 2026
Present:	VJ, AGS, SCM, PY, FB	Apologies:	None

Review of Previous Actions

Issue	Detail	Who?	Timeline	Status
Hook refinement	Opening sentence sharpened.	Owning member	Before Meeting 13	Complete
Transition refinement	Speaker-to-speaker transition smoothed.	Owning members	Before Meeting 13	Complete
Recording prep	Recording equipment, location, and backup confirmed.	PY	Before Meeting 13	Complete

Reflective pieces	Members confirmed reflective pieces are progressing.	All	Before submission	Partial
Meeting minutes update	Updated through the previous session.	NFB, SCM	Before Meeting 13	Complete
CWA final check	CWA confirmed fully signed and stored.	VJ	Before Meeting 13	Complete

Discussion Notes

1. Full in-person rehearsal

The group conducted the first in-person full rehearsal of the pitch. All five members presented their assigned slides in sequence. Two complete passes were performed. The first pass identified pacing issues - two members were rushing slightly through technical sections. The second pass corrected this and felt smooth and confident throughout. Each member offered constructive feedback to the others.

2. Recording-day plan

The group confirmed the recording schedule for 3 May: arrival, equipment set-up, two rehearsal passes, then up to three full takes. The best take to be selected for submission. Backup plan: if all takes had issues, additional takes would be recorded on the same day.

3. Final visual / content review

The group conducted a final pre-recording check together. PY confirmed the deck was visually consistent. SCM confirmed all slide content was accurate, with no remaining placeholder text. NFB confirmed meeting minutes were up to date through this meeting. Each member confirmed their own slides were ready.

Actions Arising

Issue	Detail	Who?	Timeline	Status
Recording day prep	Final equipment check, location confirmed	PY	3 May	Due
Final deck print	Print backup hard copies of slides for recording day	SCM	3 May	Due
Reflective pieces - drafts	Each member to have a near-final draft of reflective piece by recording day	All	By 3 May	Due
Meeting minutes update	Update meeting minutes with this rehearsal session	NFB	Before Meeting 14	Due

Meeting 14

Location:	In Person	Date:	3 May 2026
-----------	-----------	-------	------------

Present:	VJ, AGS, SCM, PY, NFB	Apologies:	None
----------	-----------------------	------------	------

Review of Previous Actions

Issue	Detail	Who?	Timeline	Status
-------	--------	------	----------	--------

Recording day prep	Equipment, location, backup all confirmed.	PY	3 May	Complete
Final deck print	Backup hard copies prepared.	SCM	3 May	Complete
Reflective pieces - drafts	All members confirmed near-final drafts ready.	All	By 3 May	Complete
Meeting minutes update	Updated through Meeting 13.	NFB	Before Meeting 14	Complete

Discussion Notes

1. Recording session

The group completed the recording in person. Two warm-up rehearsal passes were performed before recording began. Three full takes were recorded. The third take was judged the strongest by the group through collective review - pacing was natural, hand-offs were smooth, and the timing came in at fourteen minutes forty-two seconds. The third take was selected as the final submission video.

2. Submission document check

VJ ran the final submission checklist with the group: final pitch deck , final recording , Collaborative Working Agreement signed by all members, meeting minutes finalised through this meeting , individual reflective pieces. All group-level documents confirmed ready.

3. Meeting minutes finalised

NFB completed the meeting minutes record through to and including this meeting. The full record covers fourteen meetings from 28 January to 3 May. SCM cross-checked all dates, attendance, and action items against the original notes. The group reviewed the final document together. Confirmed ready for submission.

4. Submission protocol

VJ confirmed he would upload all group-level submission documents to Moodle before the 3pm deadline on Tuesday 5 May. Each member would submit their individual reflective piece via the same submission link. WhatsApp confirmation to be sent once each submission is complete.

5. Group reflection

The group briefly reflected on the project as a whole. All members acknowledged each other's contributions: PY's leadership on Starbucks research and branding synthesis; AGS's methodology and approach-paper work; NFB's evidence work, segmentation slides, and meeting minutes maintenance; SCM's slide structure, KPI design, and data mapping; VJ's coordination, project plan, and executive framing. The group agreed the workload had been distributed equitably.

Actions Arising

Issue	Detail	Who?	Timeline	Status
Final upload - group submission	Upload pitch deck, recording, CWA, meeting minutes to Moodle before 3pm 5 May	VJ	Before 5 May 3pm	Due
Final upload - individual reflective	Each member to submit individual reflective piece via Moodle before 3pm 5 May	All	Before 5 May 3pm	Due
Submission confirmation	WhatsApp confirmation once each submission is complete	All	5 May	Due
